# MOLWENI BANTWANA OUTREACH

## **Our goal is to create:**

- A Safe environment to develop emotional intelligence, enabling better choices.
- Teach family values.
- Empowering the Community with skills training.
- Teaching accountability.

## **FACE-EMOTIONS**

### **Why this course?**

1. If children are not taught to control their emotions, their emotions will control them.
2. Teach the children emotional language as this enable them to understand what and why they feel.
2. Developing emotional intelligence enables us to manage emotions effectively and avoid being derailed.
3. Children with higher emotional intelligence are better able to pay attention, are more engaged in school, have more positive relationships and are more empathic.

### **How do children develop intelligence?**

1. Creative and artistic play helps with learning and development

### **Narrative therapy**

1. Retelling your story.
2. Externalizing the problem.
3. Deconstructing the issues.
4. Unique Outcomes Theory.

### **What are the benefits of narrative therapy for children?**

Narrative therapy encourages the child to look at life moments in which the problem was not around, exploring celebrations, achievements, and awards; an opportunity for the child to begin rewriting their story without the problem.

In order to do this, we need to take the children out of their “normal” where they can over a weekend get the foundation of rewriting their story, we will then follow up weekly with one-on-one sessions with the children.

The camp will also allow for us to identify abusive situations at home, it is our duty to intervene where children are being abused in every way shape or form.

# FACE-EMOTIONS COSTING
